W3D4 Quiz

CS472 WAP October 2016 – Prof. Zijlstra

1. Explain what Model 1 and Model 2 mean:

Model 1 → everything in one page, access database, make control desicison and generate HTML

Model 2 → separate into Model / view / control layers

2. When are JSP pages compiled?

On first request → translate into servlet and then compile

3. Why are scriptlets deprecated?

They would add business code to the view layer → encourages bad separation of concerns

4. What is a Java Bean?

- Default (no arg) Constructor
- Serializable
- Getters / setters for properties
